

Weatherly Tile incorporates simplicity and classicism in style

When Gaye Weatherly met with 02835 in her new showroom, her enthusiasm for her product lines and the

manner in which they can be combined was contagious.

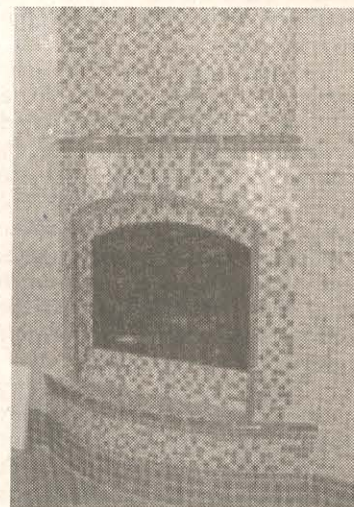

Displaying natural stone and specialty tile products,

including the largest selection of glass products in New England, Weatherly noted that "Bringing the serenity of the surrounding water, sky, and beach areas inside is of particular importance to me, as is incorporating simplicity and classicism in design. My selection of granites, marbles, stones, and tiles is intended to enhance our local lifestyles and architectural designs, and cannot be found elsewhere."

Giving an example, she noted that glass and glass mosaic tile are available in numerous hues, sizes, and finishes, including custom designs and combinations. Light-reflecting iridescent tiles, luminous and velvet-textured tiles that resemble beach glass,

and handmade glass trims glisten in colors and patterns that woo all the senses. In addition, many of the glass tile products are made of reclaimed and recycled glass.

Quality customer service distinguishes Weatherly's business and explains why she is an exclusive supplier to leading architects and designers who work in Jamestown, Newport and the surrounding areas. With the ability to make job site visits, work closely with the homeowner, designer and contractor, and provide superior product and service, Weatherly has developed a significant portfolio of local projects and a growing list of delighted customers. Many are from right here in Jamestown.
