

## Not Your Average Tile ▶

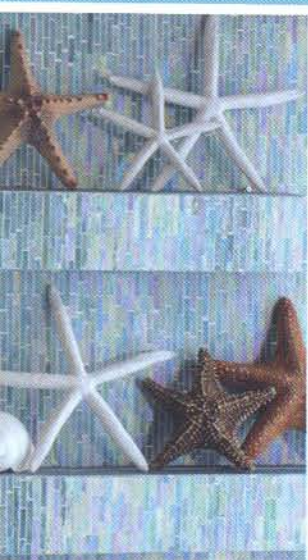

Much like the kitchen or bathroom, the fireplace is another one of the many points in any home that can be enhanced by custom tiling. For a seaside residence in Jamestown, RI, Gaye Weatherly of Weatherly Tile & Stone arranged for a soft aqua ceramic tile to frame the fireplace. This tile achieves true depth and definition by the pooling of the gloss glaze. Square, clean edges deliver a classic composition, complementing the home's traditional, neo-classic décor. "With a translucent glaze and botanical ornament style," says Weatherly, "this tile creates a tranquil and romantic focal point in a large-scale room."

For another discerning client, Weatherly was able to accommodate a request for a tile that would be "imaginative, whimsical, and awe-inspiring." For this homeowner, she delivered a handmade pillow jade tile with a natural glow and translucence. "This tile is cut from natural jade," explains Weatherly. "It is then hand-composed by artisans in China to ensure a balance of color and contrast."

With an array of unique, extraordinary, and fun tiles, Weatherly prides herself on helping clients express their personality through their tile choices. ■
